Dodongo's Cavern by MiniWorld 3D

Palette / MMU Version

-----

### Instructions:

1. All colors of the main section are to be printed together, except for the left and right walls with their ribs, and the skull and jaw.
2. The side walls, named "left" and "right" must be printed rotated 90 degrees, with the flat "outer wall" side on the print bed. Include their corresponding ribs when printing and "switch" on the Right wall.
3. The skull and jaw must be printed separate, without support. The Skull vertical, lying on the flat side behind it, and the jaw horizontal, as is.
4. Use a piece of filament for the hinges, trim a section of about 45mm long and insert it through the hinge holes.

-----

MiniWorld 3D is the collection of 3D printed landmarks and models of the real and FANTASY world! All our models are made from scratch by hand and brain, please give credit to all authors. This was modeled in Autodesk Fusion360. Please do not publish this online as yours. Talk to us for any redistribution or physical print sales, we are very open to work something out.
